

Serial No. 10/817,362

REMARKS

The aforementioned deletions and insertions to the Specification are believed to be in compliance with CFR 1.121. In order to clearly set fourth the amended portions of the specification, applicants have submitted the following (i) a reference to the section heading along with an instruction, which unambiguously identifies the location, to delete that section of the specification and to replace such deleted section with a replacement section; (ii) a replacement section with markings to all corrections relative to the previous version of that section.

The applicants have amended a portion of the Specification with the objective of presenting a full, clear and complete description of the cultivar in order to comply with 37 CFR 1.163 and 35 U.S.C. 112 and to overcome the objections listed in the Office Action dated 11/24/2004. Specifically:

In response to the objections set forth in paragraph A of the Office Action, the Specification has been amended to correct the recitation referring to the geographic location where the new plant was invented.

For all the reasons listed above, the applicants respectfully submit that the errors in the Specification are corrected, and that the claims comply with Section 112. The application is believed to be in condition for allowance, and notice thereof is respectfully requested.

Applicants have enclosed a statement under 37 CFR 3.73(b), which establishes evidence that the undersigned is authorized to act on behalf of the assignee, Poulsen Roser A/S.

Respectfully submitted,

Ken Ryneerson
Poulsen Roser Pacific, Inc.
